

Data on the Spanish version of INFE: some comments

(July 2023)

Sample of 7,764 individuals drawn by the Spanish Statistical Institute (INE). It is representative of the Spanish population of individuals between 18 and 79 and of each of the 17 regions (*Comunidades Autónomas*, in Spanish).

Replicate weights are provided to enable users taking into account sampling design features in the estimation of the sampling variances (both for the Spanish dataset of the OECD/INFE International Survey of Adult Financial Literacy Competencies and for the full version of the ECF 2021).

The files INFE_replicate_weights provide 1000 replicate weights per observation. The variable name of weight i is FACTOR_ i , where $i=1, \dots, 1000$. The variable N_FACTOR_ i is a multiplicity factor that indicates the number of times a given individual i appears in a particular bootstrap sample.

A. General comments:

Value -5 was used in cases when the question was not answered due to a programming error or to an error of the interviewer.

Value “.” (missing) used in cases where some particular response option included in the INFE/OECD blueprint questionnaire is not asked in the Spanish survey.¹

B. Specific questions

ID Individual identifier

Randomly assigned number, goes from 1 to 7,764.

wght Weight

Cross-sectional weights to compensate for unequal probability of the individual being selected into the sample given the geographical stratification, and differential unit non-response.

QD2 Region

17 values, where the codes are as follows:

1 Andalusia

2 Aragon

3 Asturias

4 Balearic Islands

5 Canary Islands

¹ In questions QF2, QS1, QS2, QS3, QK7 and QD11 we have left out of the data file those answer options that we did not contemplate in the Spanish survey, because they are completely independent sentences.

- 6 Cantabria
- 7 Castile-Leon
- 8 Castile-La Mancha
- 9 Catalonia
- 10 Valencia Region
- 11 Extremadura
- 12 Galicia
- 13 Madrid Region
- 14 Murcia Region
- 15 Navarre
- 16 Basque Country
- 17 La Rioja

QD3 Municipality size

Drawn from INE's registers. To preserve confidentiality, we provide information on whether the municipality of residence has less than 15,000 inhabitants (value 1) or 15,000 inhabitants or more (value 2).

QD4 Language

The questionnaire was written only in Spanish and, to avoid uncontrolled translations by the interviewer, interviews were to be conducted in that language (coded as 1).

QD5 Household composition

In QD5_5 (With other relatives) we include father/mother of the sample member, father/mother of the partner, grandparent, grandchild over 18, sibling over 18, son/daughter-in-law/daughter-in-law, other relatives.

QD7 Age

Age as of November 1st 2021. May include individuals aged 17 and or 80 depending on whether the date of the interview is before or after that date.

QF1 Day to day financial decisions of the household

The Spanish questionnaire asks one-by-one whether each member of the household takes part in day-to-day decisions about money and then, one-by-one, who takes part in decisions about properties, financial products and debts.

The INFE/OECD questionnaire asks directly who is the responsible person who makes day-to-day decisions about money in the household: whether the respondent makes money decisions by himself/herself, whether he/she makes them with someone else, or whether someone else makes the decisions. Hence, from the answers above we build the question equivalent to QF1.

QF8 Retirement confidence

The wording of the question is different. ECF asks the respondent to rate from 1 to 5 how well they are preparing their retirement (if not retired yet). If retired, how well did they prepare their retirement.

QF9 Retirement plans

ECF includes answers like “bequests” or “expected bequests” in the option “by relying on your children or other family members to support you”.

QF11 Not Covering costs

The question in the ECF refers to whether the household income as a whole has been lower than expenses at some point in the last twelve months.

QF12 Making ends meet

The question in the ECF asks how the household financed the difference between income and expenses when answered Yes to QF11. Options _1_2 (cut back expenses), _2_1 (working overtime), _2_3 (ask for help from family, friends or the community), _3_4 (take loan from your savings and loans clubs or other informal savings club), _3_5 (use someone else’s credit card), _5_2 (take out a payday loan), _5_4 (take an SMS loan) and _5_5 (take an online instant cash loan) are not considered ways of financing expenses above income and were not included as an option.

QP

QP1, QP2, QP3: Heard of; Currently holds; Recently chosen

The list of financial products is the following:

QP1_1, QP2_1, QP3_1: Pension funds

QP1_2, QP2_2, QP3_2: Mutual funds

QP1_3, QP2_3, QP3_3: Mortgage

QP1_4, QP2_4, QP3_4: (Loan secured on a property not asked in the Spanish questionnaire)

QP1_5, QP2_5, QP3_5: Personal loan

QP1_6, QP2_6, QP3_6: (Car loan not asked in the Spanish questionnaire)

QP1_7, QP2_7, QP3_7: Credit card

QP1_8, QP2_8, QP3_8: (Current account. QP1_8 and QP3_8 not asked in the Spanish questionnaire)

QP1_9, QP2_9, QP3_9: Savings account

QP1_10, QP2_10, QP3_10: (Microfinance loan account not asked in the Spanish questionnaire)

QP1_11, QP2_11, QP3_11: Insurance (including life and private health insurance)

QP1_12, QP2_12, QP3_12: Stocks and shares

QP1_13, QP2_13, QP3_13: Bonds

QP1_14, QP2_14, QP3_14: (Mobile cells not asked in the Spanish questionnaire)

QP1_15, QP2_15, QP3_15: (Prepaid debit card not asked in the Spanish questionnaire)

QP1_16, QP2_16, QP3_16: Crypto-assets

QP1_17, QP2_17, QP3_17: (Sustainable financial products not asked in the Spanish questionnaire)

Following the same criteria as for the other questions, QP2_98 and QP3_98 refer to the fact that the whole question is not applicable (instead of “none”).

QP4 Most recent product

Set a value of 0 when the most recently acquired product was not chosen voluntarily.

QP5 Choice of the most recent product

In the Spanish questionnaire there are more cases for which QP5 won't applied even among those who answered yes at any of QP3_1 (pension), QP3_2 (investment), QP3_3, QP3_4, QP3_5, QP3_6, QP3_10 (loans), QP3_7, QP3_15 (card), QP3_8, QP3_9, QP3_14 (account), or QP3_11 (insurance), because QP5 also requires the acquisition to be by own choice. For those cases, when the acquisition was not chosen voluntarily, we are leaving the value -98.

QS1 Statements on attitudes and behaviours

In QS1_10 (I have too much debt right now) we added an extra option “I do not have debts” (value 6).

QS2 Statements on attitudes and behaviours

In QS2_5 (I pay my bills on time) we added an extra option “I do not have bills to pay” (value 6).

QD9 Educational attainment

We provide a classification based on the OECD/INFE 2022 questionnaire and on ISCED (QD9_ISCED). We prefer the second.

QD13 Income

The categories are different from those in the OECD/INFE 2022 questionnaire:

1 below 15,000 euro (estimated to be the 25th centile of the annual gross family income distribution at the time of fieldwork)

2 between 15,000 and 47,000 euro (estimated to be the 25th and 75th centiles of the annual gross family income distribution at the time of fieldwork, respectively)

3 above 47,000 euro
